TEAM TYPES

Team Category – a team is comprised of 3 to 5 members, each of whom runs the Course individually (that is, on-air (as COVID protocols permit), in full turnout gear) and receives an individual time. The team time is composed of the three fastest individual times from team members added together. If there are less than three members with times due to disqualifications, no-shows, etc., there is no time, and the team will not receive consideration for placement.

Veteran Relay Team Category – a group of 3 to 5 members, each of whom completes part of the Course before handing a baton over to another member. The members are in full turnout gear, except that facepieces are not worn. They usually are seeded with their first race at regional events and then enter an elimination bracket based on their seeding time. New and veteran relay teams typically compete in separate brackets.

New Relay Team Category – a group of first-time competitors in the Firefighter Challenge who get to enter into the Challenge 'free of charge'. Relay teams consist of a group of 3 to 5 members, each of whom completes part of the Course before handing a baton over to another member. The members are in full turnout gear, except that facepieces are not worn. They usually are seeded with their first race at regional events and then enter an elimination bracket based on their seeding time. New and veteran relay teams typically compete in separate brackets.

Tandem Category – a pair of competitors, each of whom completes roughly half the Course, with the handoff coming before or after the Keiser Forcible Entry Evolution. The members are in full turnout gear, except that facepieces are not worn. A tandem team may qualify for multiple categories but must specify beforehand which category they wish to compete in. (To compete in more than one category, it requires running more than one race, each designated as the specific category for consideration).
